Date: _____

Project: Me | Short Essay Test

1. Identify at least three elements of culture and discuss some similarities and differences between your culture and the culture of another student from our partner classroom.

2. From what you have learned during this project, discuss how culture, people, places, and environment can shape a person's identity. How have you seen this to be true in your own life?

3. Science, and its practical application, technology, have had a major influence on social and cultural change, and on the ways people interact with the world. Discuss the role that science and technology play in your life and in your culture.
4. Which subtopics did you explore with your group? Discuss the process of asking questions, gathering relevant information from multiple sources, and drawing conclusions. What was the most interesting (or surprising, enlightening, baffling) discovery you made?

5. What are some ways people can respect cultural differences so that they can work effectively with people from a wide range of social and cultural backgrounds? Do you think it is possible to leverage social and cultural differences to create new ideas and increase both innovation and quality of work? If so, give an example.

6. From what you have explored during this unit, explain 'uniqueness'.
